

## Fall Clock Wreath

### Supply List

- Artificial Leaves
- Clock
- Clear Packing Tape

### Step 1:

Purchase large, artificial leaves in your favorite fall colors. For this example, I purchased 3 packs of 6 leaves, with one pack in browns, one in greens, and one in oranges. The exact number of leaves that you will need will depend upon the diameter of your wall clock.

### Step 2:

Determine what pattern you would like to see your leaves in and start taping them to the edge of the clock, one at a time. To do this, place one leaf where you want it, tape down the stem, and then layer the next leaf right on top, covering the stem and the tape of the last leaf. Continue doing this until you have gone the whole way around the clock.

### Variation:

Try using pine sprays around Christmas or dogwood sprays in the spring. This could even be done with large artificial flowers.
